Fostering Partnership
MEMBER ADVISORY COUNCIL
THE HISTORY, THE STORY, THE PURPOSE

PURPOSE

The Member Advisory Council (MAC) takes an active role in improving the CareOregon member experience. The council identifies improvement opportunities, provides general feedback and ideas about CareOregon department plans/activities/programs and works to engage fellow CareOregon members and the community on health care issues.
TIMELINE

12/03/2009
Member Centric Team pledges to rebirth MAC

10/26/2010
Held 2nd focus group
- 4 MAC members selected

11/12/2010
Held 3rd focus group
- 5 MAC members selected

07/13/2010
First MAC meeting held

01/25/2011
Member Open House

04/14/2011
MAC at Board Retreat

06/29/2010
Held first focus group
- 6 MAC members selected

12/15/2010
1st Full MAC Meeting

04/18/2011
Health Care Action Day in Salem

MAC MEMBER BIOS

1. Maria Morrow – Chair – Maria was one of the original members to join the MAC in July 2010 to advocate for members with mental illness. She was elected Chair by her fellow council members in March 2011.

2. Diane Myers – Vice Chair – Diane joined the MAC in July 2010. She brings with her experience as a member of the Health Services Advisory Council at Central City Concern.

3. Judy McClenny – Scribe – Judy is a wife and mother. Her two teenage daughters, husband and she are covered by CareOregon.

4. Kevin Rouse – Kevin joined the MAC in Dec. 2010 and has been a CareOregon member for 3 years.
5. Mahin Asagari Sereshki – Mahin is from Iran and joined the MAC in Dec. 2010 so that she could help others receive health care.

6. Charles Robertson – Charles volunteers with Janus Youth to create the Village Market, a non-profit grocery store that will provide health food from local farmers and vendors to residents in North Portland.

7. Sele D’Amato – Sele joined the MAC because she wanted to help other members with their health care issues.

8. Madeline Mettler – Maddie serves on the MAC to educate herself and the public about health care issues.

9. Brenda Berger – Brenda is a CareOregon Advantage STAR member and joined the MAC in Dec. 2010.

10. Annette Parker – Annette is a long-time CareOregon member wanted to join the MAC to improve the CareOregon and OHP member experience.

11. Edilberto Pulanco – Edilberto joined the MAC in Dec. 2010 and is also on the Board at the OHSU Richmond Clinic.

12. Santiago Gomez – Santiago was recruited through his involvement with Central City Concern. He joined the MAC in July 2010.

13. Michael Morgan – Mike was one of the original six members of the MAC and brought with him years of experience in radio communications.

14. Nancy Judkins – Nancy has been with the MAC since its inception in July 2010.
THE MAC'S VISION FOR THE FUTURE

- Member Leader Development through leadership, advocacy & media training
- Work with CareOregon & providers to improve population health and experience of care
- Develop Community Health Liaisons program that enable members to reduce costs of care through improved self-help and social care
“I’m one of those people who has tried to correct the hardships in my childhood by raising my children—giving them everything I didn’t have,” says Member Advisory Council chair Maria Morrow. “So stability has been a big, big thing.” Maria says she has been on CareOregon for more than 10 years, and her children have always had the same pediatrician. “When you are raising children there is nothing scarier than not having medical coverage…knowing they are covered is such a good feeling, because then you don’t worry if someone gets a fever or they seem to be getting sick…If you have to take them to the doctor you can, and that’s really important.”

Margaret Wright, like 262,000 other adults in Oregon, has diabetes. She eats healthily, exercises religiously and makes taking care of herself a priority. But this wasn’t always the case. Like an estimated 76,000 Oregon adults, there was a time when she was living with undiagnosed diabetes. Once Margaret was diagnosed, she received great training about controlling her diabetes.

“Doctors now are very good; the medical profession is excellent,” Margaret says. “They can pick up these things if you are there. If you aren’t there, they can’t pick them up…Most things would be better if you catch them in the early stage.”

At CareOregon, we believe everyone deserves access to the right care at the right time. Accomplishing this takes our collaboration with an entire community. That’s why in 2007 we joined the Institute for Health Care Improvement (IHI) with 14 other organizations to implement the Triple Aim. The goals:

- Improve the lifelong health of the whole community
- Enhance every patient’s experience of care (including quality, access and reliability)
- Reduce, or at least control, the cost of care so it is affordable for everyone

In 2010, as with the last three years, every strategic goal and all our operational efforts supported one of these three aims. With the state facing major budget constraints, never before has the need for an innovative, collaborative, community-wide effort been greater.

Come share our journey toward better care and better health—because we’re better together.
BETTER TEAMWORK
“It’s so much about communication with your doctor… But the doctors, the programs, the hospitals, the health plan providers all have to work together,” says William McClenathan, who serves as a caregiver for his mother CareOregon member Roberta McClenathan.

According to William, Roberta is now doing so well with her diabetes that she may be able to come off her insulin soon. “The doctors are thrilled, but it didn’t come just from her trying….” says William. “It took an entire group of people working together to bring that around. Which in the long run saves money, and she’s healthier.”

How do you support Community Health?

At CareOregon, we agree with William. As part of the community, our role is to partner with others to support better health for all. First and foremost is making sure patients can get appointments with providers when they need them. To combat this issue, in 2010 we collaborated with several communities to open four new health clinics.

In Beaverton and Milwaukie, CareOregon Community Health clinics now serve anyone in need of care. We also partnered with the Multnomah County Health Department (MCHD) to create the Rockwood clinic, designed to serve 8—10,000 low-income patients in one of Portland metro’s most underserved neighborhoods. CareOregon purchased and renovated the building, which is staffed by the MCHD.

The Gladstone Center for Children and Families takes inter-agency cooperation further, signaling the wave of the future in which multiple agencies group together to meet families’ overall needs. The center, which also includes a relief nursery and Healthy Start program, was converted by Gladstone School District from an old grocery store in 2007. And in 2010, Clackamas County Health Department and CareOregon Community Health joined the team by creating the Gladstone community health clinic.

WORKING TOGETHER FOR A HEALTHIER COMMUNITY

Roberta McClenathan is a survivor. She was diagnosed with cancer at age 55. Now at 75, she’s still going strong with the help of her son William and her home health aide and friend Eileen. Roberta works hard at managing her diabetes and other health issues. Her son William says, “I love my mother and want her quality of life to be as good as it can be, but I can’t do it alone.” Roberta adds, “I’m very much alive and I’m thankful for the help CareOregon has given me.”
Charles Robertson has a talent for bringing people together. A member of CareOregon’s Member Advisory Council, for the past year he also has been an integral part of the team organized to establish a non-profit grocery co-op in his neighborhood. He’s all about making connections and community, which is why he spends time with the local boys and girls club. “I’ve always been inspired to work with kids. I like to teach them that you get out of life what you put into it. That’s life.”

Charles Robertson, a strong community advocate, knows health care is a collaborative effort. When he became a CareOregon member, Charles was suffering from infections as a result of severely decayed teeth. He says, “CareOregon gave me my smile.” But actually it was a joint effort, with CareOregon supporting the attendant health issues, and dental care offered through a partnering Oregon Health Plan dental care organization. Charles’ experience provides a great example of why caring for the whole person and the whole community is critical.

Both state and national health reforms are presenting new collaborative opportunities. In 2010 and 2011, CareOregon joined the Oregon Health Authority, other health plans, the legislature and advocacy groups to brainstorm about how health care entities can combine to meet needs in a more collaborative fashion. As part of this effort, CareOregon agreed to begin offering mental health services directly to our Medicare patients in 2011.

Long-term care is another part of this equation, and CareOregon participated this year in a pilot project with the Department of Human Services’ Seniors & People with Disabilities Division. The pilot involved members in Washington County assigned to the Virginia Garcia Beaverton clinic. Preliminary results are very good. By bringing both medical care and social services into the home, participants had fewer hospitalizations and felt their needs were being met. We anticipate expanding this pilot in the future, providing services to patients with complex health conditions who need long-term care services in a community based setting.

We also expanded our collaborative efforts when Medicare members let us know that long-term relationships with specific providers helped ensure continuity of care. In 2010, CareOregon made the decision to move to a Point of Sale (POS) HMO structure for CareOregon Advantage. Now, CareOregon Advantage members can see any doctor who accepts CareOregon patients, whether or not they are part of our network.
BETTER HEALTH
Bertha Downing's sons Thayne and Eddie are CareOregon members.
As Bertha’s family knows, therapists, specialists, PCPs, hospitals and health plans must all work together to meet families’ needs. In 2010, CareOregon recognized hospitals’ unique role in the community by organizing an improvement training program called Releasing Time to Care for front-line nurses.

Hospitalization is the largest part of the health payment mix and is at the center of health care cost reform. Many Oregon hospitals already participate in Triple Aim innovations, and in 2010, CareOregon invited Britain’s National Health Service Institute for Innovation and Improvement (NHSI) to meet with Oregon’s hospitals.

Along with other community supporters, such as the Oregon Nurses Association, CareOregon established the Releasing Time to Care learning collaborative. In mid-2010, it began with four hospitals: Providence Portland Medical Center, Oregon Health and Science University (OHSU), Tuality Healthcare, and St. Charles Health System. This program puts change improvement in the hands of front-line nurses. And in its first six months, the participating hospitals had already begun reporting reductions in the number of falls, as well as increased savings and efficiencies in supply inventories.

“Minimizing interruptions to my workflow so that I have more quality opportunity to spend with the patient—really that’s what it’s all about,” said Kelly Hyde, one of the participating nurses from OHSU. The positive results encouraged the four hospitals to spread Releasing Time to Care to all units in 2011.

CareOregon also helped the community develop capacity in 2010 by providing care management training on depression and diabetes to the Primary Care Clinic teams. Members of the CareOregon network participating in our Primary Care Renewal (Medical Home) project have begun providing the one-on-one support and coaching for these health issues that CareOregon’s own CareSupport teams offer for complex and chronic conditions.

In addition, we continued our Care Support and Systems Innovation (CSSI) program in 2010, funding process improvement projects in hospitals and clinics that improve care not only for our members, but the whole community. One example is Silverton Hospital, one of the more than 75 percent of Oregon hospitals that are adopting the Surgical Safety Checklist developed by the World Health Organization (WHO). At Silverton Hospital, CSSI helped fund their transition to the checklist. This year, seven hospitals are completing improvement projects through CSSI. Three—Silverton, Willamette Falls and Tuality—are working on surgical checklists.
Tommy Dickerson has been a fireman, a police officer, a lineman and an alligator wrestler. He grew up in New Orleans, and lived there until he and his wife Kay lost their home to Hurricane Katrina. They’ve lived in Portland for five years now. Kay and Tommy both take an active role in their own health care. “I may be handicapped,” says Tommy, “but this [his mind] ain’t.”

In 2010, CareOregon partnered with advocacy groups, such as Community Health Advocates of Oregon (CHAO), to bring community members together with legislators. We recognize that the legislature must make choices as we face a severe recession, and we believe health care recipients should have a say in the decision-making process.

Kay Dickerson, a Hurricane Katrina survivor, attended one of the CHAO/CareOregon meetings to share her views. She and her husband, whose severe health issues made the loss of home and livelihood even more difficult, keep positive attitudes. “We’re doing really well, as compared to what we were,” says Kay. According to Kay, CareOregon has played an important role in their transition to the Pacific Northwest. “They’ve always been good to us. They’re good listeners.”

Listening to our members is crucial, so in 2010 CareOregon established a Member Advisory Council (MAC) and Member Leadership Program. We started with focus groups to learn how members thought the MAC should be organized. Focus group members not only told us how to organize the Council, 15 became the inaugural Council. They provide advice to CareOregon about how to improve service and communications efforts, and have established an improvement agenda for the year ahead.

The MAC sponsored its first Member Summit in January 2011, inviting members in the metro area to share their views. Going forward, they will have an advocacy role in Salem, listen to other members to identify needs, and participate on staff committees.
MAKING SURE EVERY VOICE IS HEARD

To make sure that members throughout the state can share feedback, in 2010 we contracted with a non-partisan group to conduct an annual member survey. In the past, CAHPS surveys were done every two to three years by the state. By increasing frequency, we can be sure of hearing members’ perspectives in a timely manner.

Community members can also be heard through a 2010-11 videography project. Oregon Center for Christian Values and CareOregon received a grant from the Northwest Health Foundation. Together, we’ve scoured the state to talk to insured and uninsured citizens about the importance of access to health care professionals and services when and where they are needed. The project, which can be seen at www.thesestorieshavefaces.org, gives citizens the opportunity to be heard by legislators and other community leaders throughout Oregon.

Finally, we’ve included many member stories on our new web site—www.careoregon.org—designed to provide a more interactive, user-friendly experience for members, providers and community partners.

Among other innovations, the new web site has a section devoted to Health Care Transformation. It provides readers with greater detail about the innovations and collaborative efforts described in this report, and the opportunity to become more involved in transformation efforts. In April 2011, the site will also include a new provider portal, CareOregon Connect, which will connect providers with critical information about patients and services.

Our goal, as with all CareOregon efforts, is to support members, providers and community members as we collaborate to ensure better care and better health.

Because we really are better together.
“You don’t plan on being a single parent…I actually had $10,000 saved, which was supposed to carry us through until I went back to work [after the birth of twins],” says member Carisa Bohus. “And I ended up spending it all on health care. I should have applied for the Oregon Health Plan right way. I feel really lucky that my kids qualify for the OHP. We use CareOregon and that’s been fabulous.”

Carisa Bohus’ children are all members, including Frank, Natalia (pictured right) and Antonio.
Member Annette Parker makes cooking nutritious meals part of her health routine.

CareOregon Member Advisory Council takes shape

CareOregon is asking members for help. Two projects are under way to set the course for CareOregon services and to tell the story of health care in Oregon.

This summer, a group of members have been working with CareOregon staff to set up a Member Advisory Council (MAC). This voluntary council will give members a way to help CareOregon improve service and communication. Members are needed.

CareOregon has also been asking members to talk on video about how health care has affected their lives or their children’s lives. The project is to make these videos, telling members’ own stories. That way, people who cannot testify in Salem can have their stories told and their voices heard when the state government works on new health care legislation. Members from across the state are needed.

If you would like to help with either of these projects, please contact CareLink at carelink@careOregon.org. Please be sure to provide your name and phone number.
CareOregon MAC members speak with legislators

This spring, CareOregon member focus among MAC (Member Advisory Council) members on the Health Care Action Day. The overall message of participating was: “Tell them what you need to hear.”

The rally offered a chance for Oregon citizens to speak directly with legislators about health care, in particular, legislative design to strengthen the health care system and make it more accountable to people receiving health care.

Ed Peterson, a member of CareOregon’s Member Advisory Council (MAC), says the experience was an opportunity to make a difference.

Oregon Health Plan members should participate in events like Health Care Action Day so they can be heard by public health leaders. “You only get to do it once,” Ed says, “so you have to make the most of it.”

The CareOregon Member Advisory Council is offering help to members or providers who want to contact their legislators in Salem. Call the MAC at 800-916-6758 or e-mail member教育部@CareOregon.org.

CareOregon
Better together

---

New members’ questions are the focus of MAC project

This fall, CareOregon’s Member Advisory Council (MAC) took on the task of answering new members’ questions about CareOregon and the Oregon Health Plan on video.

CareOregon has a list of questions and answers page. But as the internet becomes a more normal medium for providing information, there is greater demand for video. The MAC project is intended to fulfill that demand. And it’s the first time that support and input from the MAC has been such a large part of developing the member Q&A.

MAC members work with staff to select the questions to be answered first. They considered what members need most (for example, Medicare and Medicaid). They also looked at questions that have the most impact on members’ decisions on health needs. They worked with staff to find the answers. And they teamed up with staff for the on-camera work.

“Video is a little more engaging at first,” says MAC member Judy McGinnis. “But in the end, we had a really good video to help new members.”

The video Q&A series will be hosted at www.careoregon.org/whatsnew/CommunityQuestions. One video answering the question of how to make an appointment, in online and additional video Q&A will be added when filming and editing is complete.

The Member Advisory Council (MAC) works to improve the CareOregon member experience.

Thrivers CareOregon members are volunteering to serve on Member Advisory Council. This group reflects the diversity of our membership, and they meet to a group monthly to talk about issues affecting CareOregon members. They also participate in additional activities such as focus groups, meetings, workshops and project work.

Issues the Member Advisory Council Addresses

- Promoting health and wellness through preventive care, exercise and healthy nutrition
- Advocating for affordable, high-quality health care for all Oregon Health Plan members
- Supporting CareOregon members’ needs through peer-to-peer assistance
- Working with the State on Health System Transformation

Interested in Sharing Your Opinion or Joining the MAC?

The advice from MAC participants comes from their personal experiences of individual members, though the MAC’s goal is to reflect the views of the broad membership. To share your thoughts with the Member Advisory Council or get information about how to become more involved, contact the MAC by e-mail at maccareOregon.org or call at 503-415-9766.

As a CareOregon member you have something you would like to contribute to improving your health care system. Your Member Advisory Council is helping to improve the services of CareOregon and our provider network. Your opinions and volunteer time can both be important contributions to our efforts.

Meet Dwayne, a member of the MAC.

OMG Commons Article – Patient Advisory Walkthrough – July 12, 2011

On July 12th, Sonnet Skaar took our Patient advisory Council members on a tour of the Northside clinic in an effort to gather feedback on clinic design and signage. Our Patient Advisory Council contains a handful of our patients that volunteer their time each month to meet and provide feedback on various topics. During the walkthrough, our Patient Advisors mentioned that one of their biggest challenges while at their clinic was determining where to go after they have completed their visit. As a result, additional exit signs were placed on the wall directly across from each exam room at the Northside Clinic. They also talked about the hallways looking similar and felt they would easily get turned around if they weren’t paying attention when initially being ‘roomed’. After kicking around a few ideas, they determined that ‘themed’ hallways would be beneficial to patients when they are trying to find their way around the clinic. Based on this feedback, Sonnet was able to put these ideas into action at the Northside Clinic, with various “earth element” hallways, including mountains, trees, and fishing.

Seeing through the eyes of the patient has helped us implement something that we hope will be helpful to all patients using Oregon Medical Group’s services.

A huge ‘thanks’ goes out to our Patient Advisors for their time and effort in helping us make Oregon Medical Group a comfortable place to receive care! And, thank you to Sonnet Skaar for being open to using patient feedback to implement ideas at OMG’s newest clinic!

Jill Rogers, Preventive Services Analyst
Dedicated Physician Leadership

Dr. John Barnes, M.D.

Journey Towards Patient Engagement
Council at Work
The Winthrop Patient and Family Advisory
Some of our accomplishments include:

- Developed council charter and elected chairperson.
- Input on several medication reconciliation projects.
- Participated in MaineGeneral Fall Retreat.
- Council Chair invited to the New Regional Hospital Groundbreaking Ceremony.
Input on system wide “Blue Folder Project”
Development and implementation of a patient satisfaction survey.

The Maine General Patient Satisfaction survey developed, reviewed, revised and implemented by the council and are used to:

- used system wide in Maine General Physician Practices and Specialty Practices.
- results are shared periodically with the council and are used to determine what programs and issues the council wants to work on.
- provide patient feedback on a number of issues including wait times for phone call backs, appointments, and time spent with your provider.

The Maine General Patient Satisfaction Survey developed, reviewed, revised and implemented by the council.
Site Visit to Minnesota.

Katie and Judy went on a site visit to Minnesota. Out of that visit came the council asking that provider team pictures be hung in the waiting room. The council asked that pictures hang in that provider team department. The recruitment cards that they saw there are being revised to help recruit new members for all of Maine General Physician Practices. Mainegeneral.
Provider Team Pictures

Patient Advisors suggested putting provider pictures in the lobby to allow patients to “put a face with the name” at the suggestion of Patient Advisors.

Providers were hung in the lobby.
Recruitment of New Patient and Family Advisors

You are invited! Partner with us in your care.

Dear ______________________,

At MaineGeneral, we partner with our patients and families to improve your care. Listening to our patients and families and problem solving together leads to better care, which is why we’re here.

I believe you have the qualities needed to work with us to make a difference as part of our Patient-Family Leadership Team.

If you are interested, it would be a pleasure to talk with you. Please contact: Betty Girard, MGMC Patient Family Advisory Council coordinator 377-1408 or betty.girard@mainegeneral.org

Sincerely,
More to come...

Medical Group Survey

Thank you for your interest in the patient- and family-centered care effort under the Oregon Health Care Quality Corporation’s leadership. Your participation in this survey already reflects your understanding of the importance of patient and family engagement in all aspects of healthcare delivery.

Directions: Please answer all 18 questions below. We will provide technical assistance to organizations who wish to actively improve their own patient- and family-centered initiatives. Thank you.

### Patient and Family Centered Care Practices and Leadership Engagement

1. Does your practice/clinic have a patient- and family-centered care vision, mission, and philosophy of care statements that promote partnerships with patients and families?
   - No
   - Don’t know
   - Yes

2. Do the practice’s/clinic’s leaders (check all that apply)
   - Invest time and financial and personnel resources in patient- and family-centered initiatives?
   - Through their words and actions, hold staff and clinicians accountable for collaborating with patients and families?

3. Does your practice/clinic communicate your patient- and family-centered care vision, mission, and philosophy of care clearly throughout the practice/clinic to staff and clinicians, patients and families, and others in the community?
   - No
   - Don’t know
   - Yes

4. Does your practice/clinic budget time, financial and/or personnel resources in patient- and family-centered initiatives [reviewing patient education materials, designing new facilities, quality improvement teams, etc.]
   - No
   - Don’t know
   - Yes

5. Does your practice/clinic have a Patient and Family Advisory Council?
Patients and Families As Leaders: Transforming Patient and Family Engagement In Oregon Health Care Organization Assessment (Modified from IFCC Getting Started Toolkit)

6. Do patients and families serve on committees or work groups? Please check all that apply
   o Patient/family education
   o Care of chronic conditions (e.g., self-management support)
   o Peer-led education and support
   o Planning group visits
   o Patient safety
   o Transition planning
   o Information technology
   o Oversight of culturally and linguistically appropriate services
   o Community services and programs
   o Staff orientation and education
   o Policy and procedure development
   o Primary or ambulatory care redesign
   o Quality improvement
   o Facility design
   o Other ____________________________

7. Are there systems in place to ensure that patients and their families have access to complete, unbiased, and useful information? Check all that apply
   o In a range of informational and educational programs and materials
   o That is consistently available to patients and families
   o That is provided in primary languages and at appropriate literacy levels
   o That includes examples and images that reflect the diversity of patients and families served by the practice/clinic

8. Do you provide patients and family meaningful and easy access to their medical records [paper or electronic]?
   o No
   o Don’t know
   o Yes

9. Are peer-led educational programs available and accessible to patients and families?
   o No
   o Don’t know
   o Yes
10. Are web-based opportunities for information-sharing and networking offered to patients and families?
   - No
   - Don’t know
   - Yes

### Education of Staff, Clinicians, Students, and Trainees

11. Do orientation and education programs prepare the following people for collaboration with patients and families in care and decision-making? Check all that apply
   - Staff
   - Clinicians
   - Students and Trainees

12. Are patients and families involved as presenters in orientation and educational programs?
   - No
   - Don’t know
   - Yes

### Patient-Family Centered Care Technical Assistance?

13. We welcome any additional comments here. We are especially interested in knowing if your organization plans to start a Patient and Family Advisory Council/Board and any other patient-and family-centered “Best Practices” you would like to share.

14. Awareness is a key in any transformational journey. Understanding where we are compared to national/state benchmarks in patient-centered care can be a driver for change. Would you be interested in presenting best practices your organization has developed in the area of patient-and family-centered care? Awareness is a key in any transformational journey. Understanding where we are compared to national/state benchmarks in patient-centered care can be a driver for change
   - Yes, I am interested in presenting our organizations “Best Practices”
   - No, I am not interested in presenting
   - Maybe, I need more information

15. Technical assistance/consultation will be available to organizations interested in achieving transformational patient centered goals. Are you interested in receiving technical assistance?
   - Yes, our organization would like to apply for ongoing technical assistance/consultation
   - No, I am not interested in receiving ongoing technical assistance
   - Maybe, I need more information
Thank you!

You have now completed the survey.
Patient Partner Questions for PCR Teams

1. On a scale of 1 to 5 how valuable (1 = not valuable; 5 = extremely valuable) has the participation of a patient partner been in advancing your progress on your PCR goals? Please explain your answer.

2. Has the participation of your patient partner increased your PCR’s team understanding of the patient perspective? If so, how has this been meaningful?

3. Please describe the activities and conversations in which you’ve included your patient partner. (Example: Team meetings, Pt. Brochure design, etc.).

4. Did you include your patient partner in the process to develop/revise your practice brochure? If so, in what ways did your patient partner’s perspectives help in the design of the brochure?

5. Have you made any changes in your clinical workflow, clinic environment, or care delivery as a result of insights shared by Patient Partners? If so, please explain.

6. What have been some unexpected benefits that have arisen as a result of working with your patient partner?

7. What have been some unexpected challenges of working with your patient partner?

8. Additional comments or suggestions?
